

I have heard of the Low Power FM (LPFM) that will affect the current FM translator service that provides our K-LOVE station (94.3 FM). If LPFM is going to take priority and will result to us losing our signal for our station, then I am going to stand up against it. It will not only affect me but my community of avid listener to this station. There are testimonies that showed how listeners had a change of heart because they responded to the positive vibe provided by our K-LOVE station. The handicap on providing our community with a good and positive influence will be severe. Everybody needs to hear positive music, message and influence in their radio station. It's something many of us look forward to in our day. Please think over prioritizing LPFM. My K-LOVE station is very important to me.
